

Urban Lyceum will give Austin's underserved families a new option for their children's public education.

Located in Northeast Austin, **Urban Lyceum** will be a small co-institutional **public charter school** with an expected enrollment of 350 students.

Serving grades 6-12, the school is designed to provide a rigorous core education with a **Science, Technology, Engineering and Math (STEM)** curriculum focus relevant to real-world contexts.

Technology is fully integrated into our instruction and supports the entire school community as faculty and staff educate and inspire students to develop **21st century skills**.

OUR MISSION

Eliminate the achievement gap. Nurture and inspire boys and girls to become men and women who:

- Demonstrate academic excellence
- Think boldly and creatively
- Act with honor and moral courage
- Lead with distinction

OUR GOALS

Affirm the uniqueness and dignity of urban learners, inspire the pursuit of excellence, and strive to develop a connection to the global community.

Our innovative model sets us apart.

Urban Lyceum's success hinges on our **revolutionary school model**, which distinguishes us from other local schools and is based on the following ideas:

- **Gender Uniqueness.** Male and female students study on the same campus but classes are single gender.
- **Instructional Fusion.** Our blended learning model combines face-to-face instruction with technology to personalize learning.
- **Global Awareness.** Instruction focuses on STEM subjects and 21st century learning through digital media, hands-on projects, scientific investigation and the use of innovation labs to apply learning and develop skills.
- **Emancipated Minds.** Students are encouraged to think outside the bounds of convention.
- **Professional Teaching.** We recruit only the strongest teachers, and provide them with a professional and supportive teaching experience.
